Workshop of the Asian-Pacific Regional Group

'Unpacking (I)NDCs – identifying, prioritising, planning and implementing mitigation and adaptation measures'

Vinh Phuc, Viet Nam, 26 – 27 July 2016

Background

The Paris Agreement firmly places (Intended) Nationally Determined Contributions (INDCs/NDCs) at the centre of Parties' efforts in moving their economies on low emission and climate-resilient development. Almost all countries have submitted an INDC. Countries now will need to identify and implement actions to achieve their vision. Strong national policy frameworks will need to be put in place to foster and enable sustained implementation.

Objective

The workshop will utilise the momentum that was created in Paris and facilitate discussion converting (I)NDCs into tangible and ambitious mitigation and adaptation policies, projects, programmes and processes. This workshop aims to provide a platform for peer-to-peer exchange to enable developing countries to achieve their low-emissions and climate-resilient development vision articulated in their (I)NDCs. In addition, the workshop will contribute towards facilitating climate policy coherence at the national levels, capitalising on the opportunity provided by (I)NDCs. To this end, the workshop will build on the experience made by preparing and implementing nationally appropriate mitigation actions (NAMAs) and other mitigation approaches as well as the National Adaptation Plan (NAP) process and mainstreaming adaptation in the Asian-Pacific region. Specifically, the workshop focusses on:

- Paris Agreement and the implications for (I)NDCs
- Operationalising (I)NDCs
 - Developing a roadmap for translating (I)NDCs in concrete actions
 - Establishing/ strengthening institutions and systems needed to manage the NDC implementation process and successive rounds of NDCs
- NAMAs and NAPs as implementation tools for (I)NDCs
 - Role of NAMAs and NAPs for (I)NDC implementation
 - Experiences with development and implementation of NAMA and mainstreaming adaptation in Asia and the Pacific
