Welcome to NICCDIES!

The National Integrated Climate Change Database Information and Exchange System (NICCDIES) is the one-stop climate information portal of the Climate Change Commission.

NICCDIES serves as the primary climate data repository, access, distribution, and exchange center through which international partners, national agencies, and local government units, among others, can view, edit, or publish climate-related information at the national and local levels.

Check data availability on your local government.

PSF

The People's Survival Fund (PSF) was created by Republic Act 10154 as an annual fund intended to local government units and as a multi-fund community organization to implement climate change adaptation projects that will help vulnerable communities deal with the impacts of climate change. It supplements the annual appropriations allocated by relevant government agencies and local government units for climate change-related programs and projects.
